SKILLS

Libraries:
-JQuery
-ReactJS
-Redux

Languages:
-HTML
-CSS
-JavaScript

Frameworks:
-Angular
-Vue
-React Native

Coding Techniques:
-Git/Version control
-Test-driven/behavior-driven dev.
-OOP

Database Hosting:
-AWS Lambda
-Google Firebase

PROJECTS: (HIGHLIGHTS)

Mobile Chat App:
Developed a React Native chat app that allows users to send and receive data asynchronously to Google Firestore. This allows users to use the app offline, message others, send and take pictures, and share location details.

MyFlix App:
Created a web app that uses the MERN tech stack to fetch movie data from a custom API allowing users to register, log-in, add and delete movies from their favorites.

Meetup App:
Developed a progressive web app built using React through a TDD-approach. This app uses the Meetup API to fetch and display data about upcoming events, authenticating and authorizing the user through serverless functions hosted on AWS Lambda.

MyQuiz App:
Developed a web app that uses the JavaScript framework Angular to create a series of quizzes that test user's knowledge of COVID-19 and basic math.

Pokedex App:
Created a web app that uses JQuery to fetch Pokemon data in modal form from an online API.
